Intermediate

Participants

This program is intended for operational internal auditors and audit leaders who want to deepen their understanding and gain recognition of their cybersecurity knowledge.

CERTIFICATION INDIVIDUELLE ET CERTIFICATS

certification through a final exam with multiple attempts allowed.

Prérequis

Fundamentals of Cybersecurity or equivalent knowledge

Objectifs pédagogiques

- **Recognize** what drives cyber risk and how internal audit can assess control effectiveness
- **Identify** how to assess data storage solutions
- **Define** digital transformation, digitalization risks, and associated controls
- Recognize characteristics of a typical, timely patch management process
- Explain key concepts relating to the vulnerability management program, including commonly applied vulnerability management maturity models
- **Identify** how automation of business impacts the methods used in audit testing
- **Investigate** méthodes to reduce risk exposure from common API and web services vulnerabilities
- Determine how to mitigate risk exposure from common privileged access management vulnerabilities
- **Identify** methods to adjust audit approches for DevSecOps
- **Review** how to mitigate risk exposure from common SoD vulnerabilities in DevSecOps Applications
- Understand internal audit's role in continuous monitoring and continuous auditing

• Recall objectives and methods deployed in red team exercises

Auditing the Cybersecurity Program Certificate

Strengthen your role in managing cyber risks: audit cybersecurity programs, assess your knowledge with guizzes after each module, and earn

- Recall important factors relating Security Operations Centers (SOC) and incident management, monitoring, detection, and response frameworks
- Identify controls, and associated assessments, needed to operate a SOC

Contenu

Unit 1: Auditing the Cybersecurity Program:

Unit 2: Auditing Storage Management Solution and Containers:

Unit 3: Auditing Digital Transformation and Digitization Programs:

Unit 4: Auditing the Vulnerability Management Program

Unit 5: Auditing the Patch Management Program

Unit 6: Auditing automation

Unit 7: Auditing API and Web Services

Unit 8: Auditing privileged Access

Management

Unit 9: Auditing DevSecOps

Unit 10: Auditing Continuous Monitoring

Unit 11: Auditing Red, Blue, and Purple Team Testina

Unit 12: Auditing the Security Operations

Center (SOC)

Movens pédagogiques

Live sessions

Participants who complete the course are eligible to sit for the certificate exam which is administered on The IIA's LMS platform

Modalités d'évaluation des acquis

Progress of learning and assessment of participants' achievements by the trainer throughout the training course: discussion time, practical work, training exercises, guizzes. An online satisfaction survey is conducted for each trainee. This assessment is supplemented by the trainer's evaluation at the end of each session.
